Customer Reviews

Mr. Medina has done a masterful job of giving us an overview of both the reasons for the current disintergration of (western, in particular) society & the simultaneous emergence of a completely new worldview/culture. Creative destruction indeed!! I would like to thank Mr Medina for giving me, a third generation descendant of British colonisers in the Antipodes, a whole new insight into the effects of colonisation on indigenous populations & for enabling me to take a closer look at the subtleties of my own, perhaps inherited, or otherwise learned attitudes towards different cultural perspectives. This book, I sincerely believe, has aided me in my journey to becoming a better world citizen & conscious participant in the building of Baha'u'llah's new world order.

Stimulating review of pioneers in the transition from Cartesian-Newtonian science to a view of the world and humankind from a transpersonal, spiritual perspective. Thoughtful analysis of the limitations of new age humanistic approaches in relation to an approach that posits the existence of a Divine Presence that communicates to humankind through a special representative often known as a Prophet who manifests the Essence of the Unspeakable or Unknowable Creator. The author helps the reader to understand how the principles of science can be applied to the study of

spirituality and offers convincing arguments to support the idea that mankind is in need of a spiritual authority to inspire and direct the emergence of a just and peaceful society.

This ranks as one of the most illuminating and absorbing books I've ever read. It presents the alignment of the Baha'i Faith teaching with quantum physics and holism in a way that must dispel any doubt about its authenticity, importance and impact on the future of our planet. It's an amazing book that I recommend to any person searching for an alternative paradigm to the present day application of the mechanistic, materialistic and deficient (Cartesian Newtonian) Western perception of physical reality and its current pervasive and destructive impact on the planet.

This book is great and I'm really enjoying it. It's very informative and provides a great perspective on modern history and the new discoveries of our time. I would highly recommend it to anyone interested.

This is excellent for anyone who is interested in science, or a general interest in space. It is interesting to read and does not get bogged down with scientific language. It renewed my interest in Physics and guided me toward other recent ideas about the holographic universe.
