The Only Handwriting Analysis Book You Will Ever Need

Synopsis

The author, Treyce Montoya, has combined over 30 years of knowledge and skill into this 579-page book. Instead of giving you the information and letting you figure out how to do it on your own, she walks you through an entire analysis (personality profile) so you cannot go wrong. The way this book is written - if you follow her instructions step-by-step - you will know everything that there is to know about yourself or anyone else. This book contains too many graphic illustrations to count so you can visually see what she is talking about as well as reading the description. Learn the signs of violence, drugs, sexual abuse, questioned documents, learn gestalt and trait analysis, study how envelopes are written and what it means, stand-alone traits, physical and psychological illnesses, discipline style needed for various children, learning disabilities, lowercase, capitals, printed, cursive, lies, and so much more!

Customer Reviews

The images in this book are soo bad quality sometimes u cant even see some letters an the most ironic of all is that is about graphology!! spent 100 \$ expecting a good quality book which i could learn about graphology without buying lots of books.. but what i received is dissapointing and i regret buying it a 100%

I am a therapist and life coach and have found this book very helpful. I often have my clients write a story about their lives and, with this book, can determine the emotion they experience with each word and every situation they write about. You can also determine when someone is lying or holding

back information, how they feel about themselves and other people, whether or not they are emotionally or psychologically distressed, etc. I consider the knowledge within the pages of this book to be very helpful in my line of work.[..]

This is the coolest Handwriting Analysis book ever!!! You can complete an entire profile just by following this book. Great for pros and amateurs. I use it when I am analyzing any writing because there is so much information included, it is a great resource! This book will take you step by step through the process of the analysis to help you build a profile. This is like the handwriting bible, if you can't find what you are looking for in other sources, you will most likely find it in this book.
