Schaum's Outline Of Linear Algebra, 5th Edition: 612 Solved Problems + 25 Videos (Schaum's Outlines)

Synopsis

Tough Test Questions? Missed Lectures? Not Enough Time? Fortunately, there's Schaum's. This all-in-one-package includes 612 fully solved problems, examples, and practice exercises to sharpen your problem-solving skills. Plus, you will have access to 25 detailed videos featuring Math instructors who explain how to solve the most commonly tested problems--it's just like having your own virtual tutor! You'll find everything you need to build confidence, skills, and knowledge for the highest score possible. More than 40 million students have trusted Schaum's to help them succeed in the classroom and on exams. Schaum's is the key to faster learning and higher grades in every subject. Each Outline presents all the essential course information in an easy-to-follow, topic-by-topic format. You also get hundreds of examples, solved problems, and practice exercises to test your skills. This Schaum's Outline gives you 612 fully solved problems Concise explanations of all course concepts Support for all major textbooks for linear algebra courses Fully compatible with your classroom text, Schaum's highlights all the important facts you need to know. Use Schaum's to shorten your study time--and get your best test scores!

Book Information

Series: Schaum's Outlines

Paperback: 432 pages

Publisher: McGraw-Hill Education; 5 edition (December 11, 2012)

Language: English

ISBN-10: 0071794565

ISBN-13: 978-0071794565

Product Dimensions: 8.1 x 1 x 10.9 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)

Average Customer Review: 3.4 out of 5 stars Â Â See all reviews Â (30 customer reviews)

Best Sellers Rank: #22,491 in Books (See Top 100 in Books) #9 in Â Books > Science & Math >

Customer Reviews

This book by Lipschutz and Lipson is a new version of a previous Lipschutz-only work. Its quality is hard to beat at any price, when compared with existing books on LA. It has been much helpful to me, since in the last months, I had to improve my understanding of a handful of elementary and

not-so-elementary facts (like Steinitz replacement principle, the implicit equations of a subspace, PLU decomposition, Jordan and rational canonical forms...) and I felt myself kinda lost among my old beloved sources (that include: Hoffmann-Kunze's Linear Algebra (2nd Edition), Gantmacher's two volume set on matrices and Strang's Linear Algebra and Its Applications, as well as several advanced algebra volumes like Lang's Algebra). I decided to update, and I shopped around, spending some money on LA books. Voila, I got Hefferon's Linear Algebra, (excellent, though it did not fulfill all my needs), Weintraub's A Guide to Advanced Linear Algebra (Dolciani Mathematical Expositions) (it obtains Jordan form using an algorithm, but it does not mention cyclic subspaces), Axler's "LA done right" (the author pretends to avoid determinants...
